

SKI WAX FROM NATURE

360°

VAUHTI
NATURAL WAX TECHNOLOGIES

From nature to nature

Core philosophy of Vauhti is to respect people and nature. No one can close their eyes to climate change or environmental threats anymore. Vauhti want to promote sustainability by developing environmentally friendly products, so that also our children have opportunity to enjoy skiing. Vauhti took decision to compensate all carbon contained in ski waxes produced since 2015. from year 2020, Vauhti continues to compensate all the carbon dioxide emissions caused by its production and traveling.

Development work of new Vauhti 360 series is based on our two fundamental pillars:
(1) passion to create innovative and functional ski waxes and
(2) respect of nature and sustainable values.

Majority of the raw materials used in the products are from natural recourses. We did not want to focus development work only to raw materials of waxes and therefore we put ourselves an ambitious goal that also the packaging materials of the 360 series are from natural resources. We managed to achieve more than 90% of the composition of the final product from natural based materials.

360°-bottles are made of bioplastic instead of petroleum-based plastics. Sugar-cane-based plastic is used in the bottles. Solid paraffins are packed in recycled cardboard and kits in jute bags. Ingredients to waxes and maintenance products are coming from vegetal resources. We use rice, corn and sugarcane based waxes and our solvent is bio-ethanol.

Environmental footprint of natural based materials is lower than petroleum-based since while growing those capture CO₂. Those are renewable since they regenerate quickly.

We hope that Vauhti's new environmentally friendly 360 product range will offer the skier unique emotional experiences in nature on ski tracks, slopes, and mountains. Pure nature is full of joy. Let us nurture and respect it so it also gives us its share now and in the future.

Naturally from nature to nature!

**FUNCTIONAL 100% NATURAL
SKI WAX PRODUCT SERIES**

*Sugarcane-based plastic is
used in the bottles.*

**90% OF MATERIALS IN PACKAGING
ARE BIOPLASTICS**

FROM NATURE - TO NATURE

Our passion is to create innovative and functional ski waxes and respect of nature and sustainable values.

360° LIQUID WAXES

WET
for wet and damp snow

COLD
for cold snow conditions

ALL TEMP
for wide temperature range
and for variable conditions

CLEANER
for cleaning the glide zone
as well as skin stripe of
all kind of skis and snowboards

SKIN SKI CARE
for maintaining
the skin stripes

360° GLIDE WAXES

WET
for wet and damp snow

ALL TEMP
*for wide temperature range
and for variable conditions*

COLD
for cold snow conditions

360° TOOLS

BRUSH
*is made of wood body and
horse hair bristles*

TOWEL
is made of natural fiber

360° KIT BAG

KIT BAG
includes a set of products
and it is made of jute

360°
POS

POS DISPLAY
is made of plywood
